

An Audubon Cooperative Sanctuary

Sherwood Forest Homeowners Association ARCHITECTURAL & ENVIRONMENTAL REVIEW COMMITTEE

DOCK CONSTRUCTION APPLICATION

REGULATIONS

- Surface size of dock: No greater than 8 lake-ward feet (*including* the length on the lake bank) and no more than 10 shoreline feet.
- Height above lake surface: The upper surface of the dock cannot exceed 10 inches above the normal level of the lake surface.
- Height of dock post(s)/benches: Not to exceed three feet above the normal level of the lake surface.
- All docks must be constructed of rot-resistant wood (locust, cypress, redwood) or pressure-treated wood or a wood/polymeric composite material. The wood can be sealed with a natural color stain that blends with the surrounding area. Wooden docks should not be painted.

Any requests for a variance to these specifications are to be discussed first with the Lakes and Dams Committee prior to review and decision by the Architectural and Environmental Review Committee decision.

I, the Owner, have read, understand and will comply with the Architectural Review Committee's Regulations, as listed above, regarding new docks or re-construction of existing docks.
